

BG08-0011: DIGITAL CULTURAL AND HISTORICAL HERITAGE OF THE MUNICIPALITY OF PLOVDIV

Partner: Regional Historical Museum Plovdiv

Partner website: <http://historymuseumplovdiv.org/>

The Museum has a rich fund with unique collections documenting various periods of the Plovdiv history - personal effects – related to the life of political and public figures, revolutionists, as well as things – stamps, weapons, coins, maps. Enormous part of the fund has not been digitized, which necessitates the museum partnership. Respectively, the museum experts need training in order to be able to continue the digitization process after project completion. The museum will participate in the activities by placing at disposal of project two of its most renowned experts as they will be trained on digitization and they will digitize the museum collection. Also it will publish project information on its website. The Museum will allow access to its rich collection subjected to digitization; thus the project objective will be achieved – digitization, as well as the targeted project indicators – digitization of 50 000 units of movable cultural-historical heritage. Since the collections digitized will become accessible to the wide Bulgarian and European public with ensuing new tourists attracted, it will also contribute to economical development.
